Guidelines for submission of abstracts

1. Abstracts can only be submitted online at https://www.dkk2020.de/abstracts.html.
2. Abstracts must be submitted in English (American English). An exception are nursing contributions, which can be submitted in German.
3. The abstract text may contain a maximum of 1,800 characters (without spaces, but including headings and references).
4. The submitters must use the template placed in the system. The following content structure must be observed:
   Purpose, Methods, Results, Discussion, Conclusions. A uniform formatting (no paragraphs and indentations, Arial or Calibri fonts, font size 11) of the abstracts has top priority.
5. The abstract texts may not be submitted exclusively in majuscules (capital letters). This also applies to headings.
6. Illustrations, tables and graphics are not permitted in the abstract.
7. Submitted abstracts may be published at other congresses.
8. Abstracts that have already been submitted elsewhere may be resubmitted to the DKK 2020 with a scientific indication of the source.
